- Polka Dot “E” Monogram
- “Eleanor Ann” Name Monogram
- “E” and “Eleanor Ann” Monograms on Child’s Apron
- 4D QuickFont Wizard
- “ACK” Candlewick Framed Monogram

INTRODUCTION

Monogramming is one of the most popular forms of machine embroidery. From elegant traditional styles to whimsical children's designs, there is a style to fit nearly any personalized project. Monogramming is a great beginning point for those who are just learning to do machine embroidery. It is perfect for personalizing gifts and home dec.

This workbook and video set will introduce you to the art of designing machine monograms with 4D Monogram & Vision software. One of the exciting unique features of this software is the capability to view a monogram on a garment or project. There are hundreds of built-in garment backgrounds or you can import a

photo of your own. In the 4D ExpressMonogram Wizard , select from over 500 monogram envelopes (shapes). Add frames, flourishes or borders around the design. Choose from one, two, or three-letter monograms or select a name.

This workbook and video series combines software exercises with practical information about sewing and embroidery. The DVD opens with a primer on machine embroidery and introduces how to select appropriate stabilizers, threads, and needles. It also includes video tutorials of selected workbook software exercises.

The 4D ExpressMonogram Wizard is available as an add-on for the Pfaff or Husqvarna/Viking 4D Embroidery software, or as a standalone package through the Inspira 4D Monogram & Vision software. For clarity, in this workbook, "4D Monogram" refers to either software option unless noted otherwise.

Come and join with me as we explore the exciting and creative world of machine monogramming and design!

4DMonogram & Vision Features

Envelopes

Envelopes are Monogram shaping tools
Select from over 500 choices

Monogram
