

How to Update 5D Software

Jeanne Styles

www.learn5D.com and www.learn4D.com

1. Ensure that your computer is connected to the internet.
2. Temporarily de-activate your virus protection software.
3. Open 5D Configure and click only once on Smart Update.

4. Wait while your computer connects to the 5D Software Registration website. Log in with your e-mail address and password (this is the same password you used when you initially registered the 5D software). Click Next to continue.

Please log in to your record:

E-mail Address

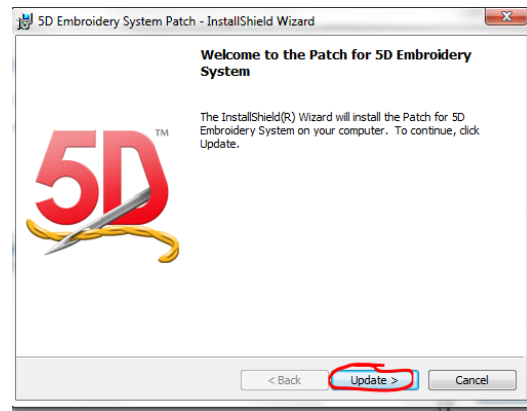

Password (case sensitive)

Next

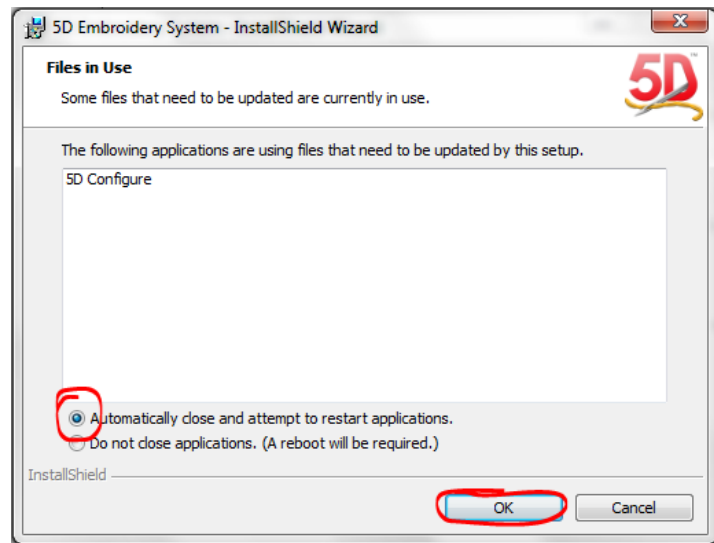

5. Smart Update checks for any updates you need. If there are any, click the update suggested and continue.
6. Wait as 5D downloads the update. Depending on your internet connection, the time to download will vary.

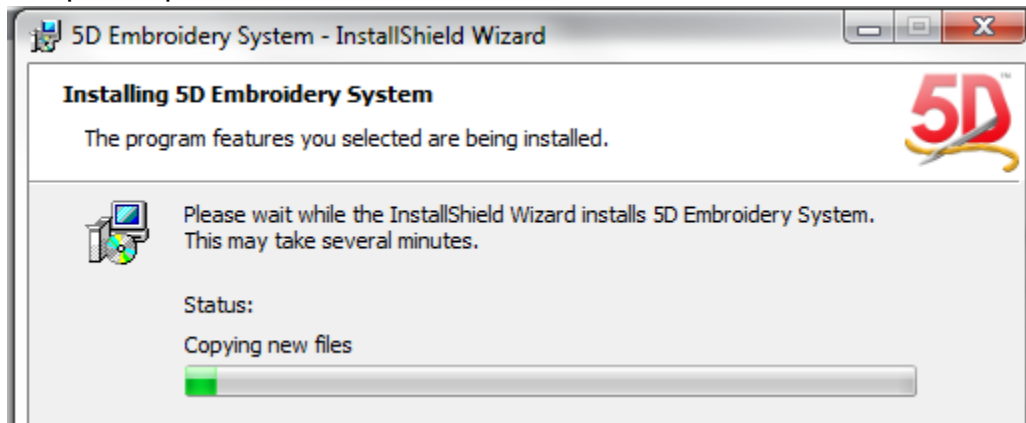

7. After the download is complete, 5D automatically opens the InstallShield Wizard. Click Update to begin the installation.

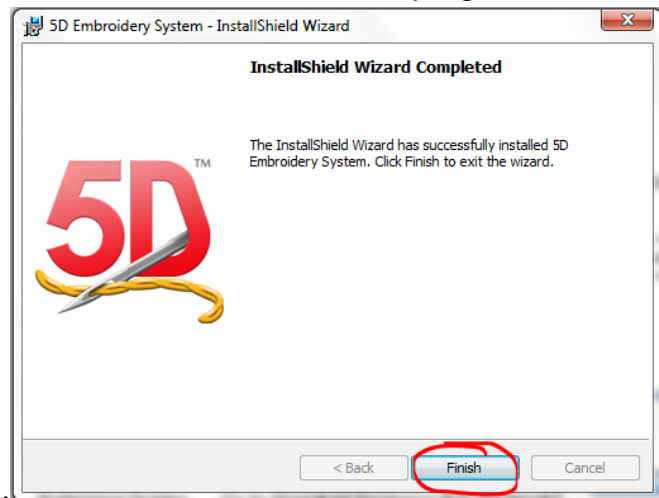

8. All 5D programs should be closed. If not, the InstallShield indicates modules that need to be closed at this point. Select Automatically close and attempt to restart applications. OK to continue.

9. Wait as your computer installs the update. The time varies depending on your computer speed.

10. When the installation is complete, the Wizard indicates that the program was

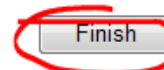

successfully updated. Click Finish.

11. You will return to the Registration Summary window. Click Finish.

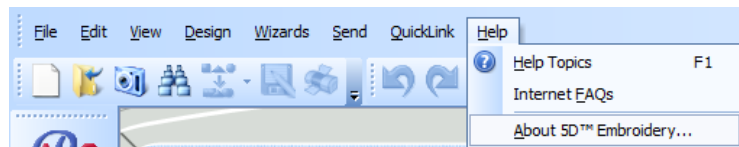

Registration Summary

Your registration is complete. Following is a summary of all your registrations.

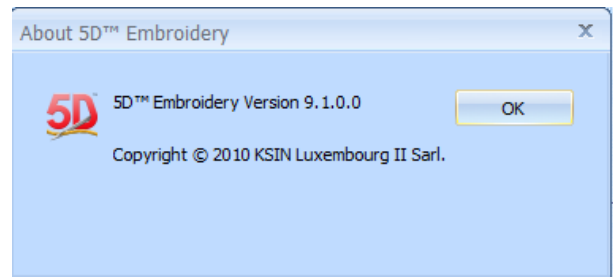

You may change or view other details by using the menu on the left.

12. Open 5D Embroidery Extra.
Click Help → About 5D Embroidery.

13. A window opens to indicate the version of 5D Embroidery. The most current version as of these instructions is 9.1.0.0. Check for new updates regularly using the same process.
